

2019 Fish Sale

Delaware Soil & Water Conservation District

This spring's heavy rains may have had an adverse impact on fish populations in local ponds. Water flowing through overflow pipes or emergency spillways could have washed small fish out of your pond. Purchase fish for restocking, or stocking a new pond at the Delaware Soil & Water Conservation District's annual fish sale. More information on the fish species and stocking rates can be found in the Ohio Pond Management Handbook by the ODNR Division of Wildlife.

Orders are due by Friday, September 27, 2019, and you can pick up your fish on Thursday, October 3, 2019 at the Delaware SWCD parking lot from 12:00 to 1:00 p.m. Please bring sturdy containers filled with pond water for taking your fish home such as a five gallon bucket or trash can **that contains a heavy duty plastic liner**, (such as a trash bag) half filled with water. Triploid white amurs require a couple of gallons of water per fish. We recommend releasing your fish into your pond as soon as possible. If you have any questions, call the office at 740-368-1921.
